What is an Eco-D EcoDistrict?

A neighborhood designation applied to a community with a green commitment and the resources to enact the vision.

Eco-D History

- Convening of sustainability oriented agencies throughout 2013, led by EcoWorks
- Selected to participate in national EcoDistricts Incubator in May 2014
- Developed Eco-D model, principles and process with founding members by December 2014
- Citywide program roll-out and designation as EcoDistricts Target Cities in 2015

Every Detroit Neighborhood • Becoming Green

Neighborhood Application

Purpose

Development is happening in Detroit. Let's do it right.

Eco-D is a collaborative initiative formed to help Detroit neighborhoods become green neighborhoods.

We invite neighborhoods to partner with us in the inaugural year of Eco-D, and to submit an application to become official EcoDistricts in the City of Detroit. We are committed to naming two neighborhoods as EcoDistricts in 2016 and provide the resources necessary to launch your neighborhood into the next phase of its sustainable development.

Opportunities

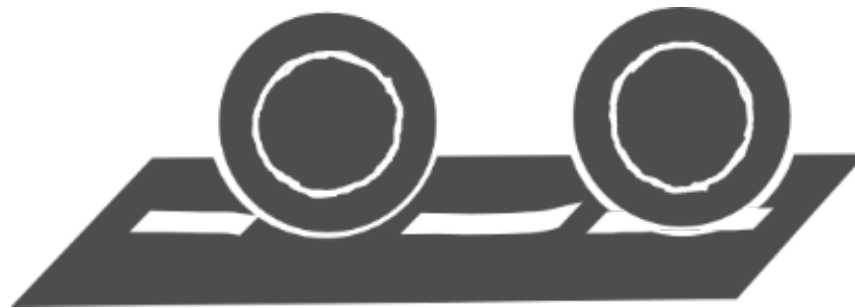

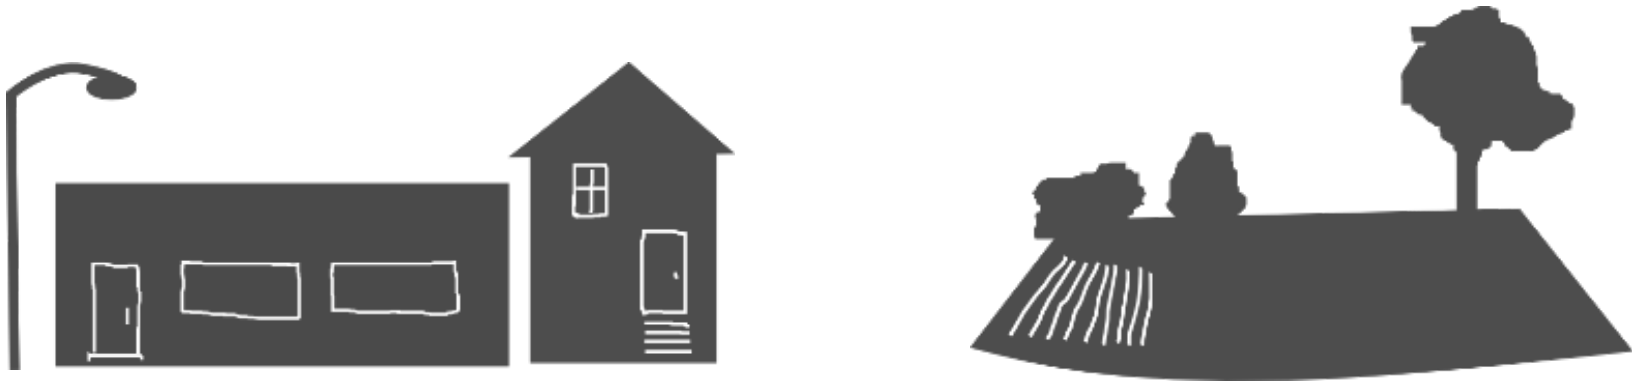

eco·D

When we find solutions that
work for those most vulnerable
in our communities, we find
solutions that work better for
everyone.
